4.ADVANTAGE AND DISADVANTAGES :

4.1.ADVANTAGES :

Invoicing and billing are essential business functions and the primary source of cash flowing into our business. However, managing invoices manually is time-consuming and error-prone. Zoho Books addresses these issues effectively and offers great features that make our invoicing easier. Zoho Books allows us to automate our payment reminders and track due dates and expected payment dates. So, it can send them to our customers automatically.

Zoho books gives more benefit to the fashion haven for creating customer ,vendors ,purchase order ,sales order, bill. In addition, we can handle all kinds of currencies and connect our accounting application with Zoho Books to support multiple currencies. Zoho Books is built to add our local tax regulations and make working with taxes easier.

4.1.1 Customization

API for custom integration: An API (application programming interface) provides a standard programming interface for connecting third-party systems to the software for data creation, access, updating and/or deletion.

4.1.2 Security

This component helps a company minimize the security risks by controlling access to the software and its data, and encouraging best practices among users.

Single sign-on capability: The software system supports a centralized authentication mechanism allowing the user to access multiple systems with a single, centrally managed password.

Role-based user permissions: Permissions to perform actions or access or modify data are assigned to roles, which are then assigned to users, reducing complexity of administration.

4.1.3 Reporting & Analytics

Users can report on and analyze usage, performance, ROI, and/or other metrics of success.

Dash Board: Users can create, customize and share dashboards, which provide an overview of the most important metrics.

Standard Report: The software offers pre-built reports with metrics standard to the category.

Cash Management: The software provides a complete picture of a company's cash flows, streamlines payment processing, and includes cash forecasting.

Bank Reconciliation: The software connects to a company's financial institutions in order to reconcile accounting records with checking, savings and credit card accounts. Often month and year closing capabilities are included.

Expense Management: The software can log and track business expenses and reimbursements, including travel-related expenses, with the ability to tie them to particular projects.

Time Tracking: The software can track billable and non-billable employee time by project.

Multi Currency Support: The software supports transactions across multiple currencies.

Regulations Compliance :The software helps users adhere to typical accounting standards and regulations such as IFRS, GASB, or GAAP.

Self Service Portal: The software provides online portals for certain stakeholders to find information relevant to them, such as employees, vendors and customers.

4.1.4.Inventory Management

The ability to track and manage the flow of goods or materials into and out of an inventory

Inventory Tracking: The software syncs orders and stock to maintain a real-time picture of inventory and supports multiple methods such as LIFO and FIFO.

Automatic reordering: The software can be set up to automatically reorder a good when it falls below a certain threshold.

4.1.5.Order Management

The ability to process orders, and track them from quote to cash.

Pricing: Users can set up complex and unique pricing requirements.

Order Entry: Users can enter an order once, and the data flows to all the necessary units such as fulfillment and billing.

Credit Card Processing: The software facilitates credit card processing.

Cost of Goods sold: The software calculates the direct costs attributable to a finished product, such as materials and labor, and includes roll-up pricing.

4.2.Disadvantages:

Users are limited to 5,000 transactions monthly, even on the highest-tier plan. Zoho supports only three users on its Standard plan and up to 10 users on its Premium plan; after that, we must pay an extra monthly fee for each additional user.

In some cases, integration with other applications and tools can be limited, which can make it challenging to work with other business solutions

5.APPLICATIONS

Zoho Books is one-stop platform for managing our accounting tasks and organizing our transactions. It's a single secure location to keep up with our company's bills and invoices, reconcile our bank statements, control our spending, oversee projects, and eliminate GST compliance worries.

The zoho books can be used in the area of education fields and also many industries can use zoho books for various purposes

6.CONCLUSION

Zoho books help them streamline their financial operations and enhance the customer service By now, we must have understood how Zoho Books is a powerful and versatile online accounting software that can help businesses of all sizes manage their finances and streamline their accounting processes.

Whether we are looking for free accounting software or a more advanced paid plan, Zoho Books is worth considering for our business. Zoho Books is an online accounting application that takes care of the accounting needs of our business. We can record, audit and analyze all financial transactions easily.

7.FUTURE SCOPE:

The Indian fashion industry is estimated to be around 108 billion dollars and is expected to grow 2x by next year and to be estimated to be around 223 billion dollars. It's also an encouraging factor that consumers spend around 6% of their incomes on apparel. While covid has dented the market as it did for various industries, the sector still presents invigorating opportunities for those who want to pursue a career in it never the less. In a country as massive as India, despite dips in trends, the demand will stay up.

Fashion in India is also very versatile, it is defined by diverse cultures, traditions and also sometimes by western trends. The industry in itself is so big that there are boundless opportunities for various skill sets. Fashion design and fashion technology are one of the most interact careers you can take up. shirts ,t shirts and shoes all fashion career objective 60% business trends and 40% discount trends offering value of fashion information.
